

An inconvenient— but absolutely necessary— truth for July 4

Since their inception, the U.S. armed forces have perpetrated genocide against Native American people; invaded, occupied, and staged coups throughout the world; dropped nuclear bombs on civilian populations; napalmed farming villages and everyone who lived in them; trained legions of baby-killing death squads; assassinated leaders they didn't like; terrorized wedding parties with drone bombings; and much more.

They've also lied about every bit of this.
