

The new synthesis of communism brought forward by Bob Avakian represents a qualitative advance in the scientific approach to making revolution and emancipating humanity

Bob Avakian

“There is an urgent need for this new synthesis to be taken up, broadly, in this society and in the world as a whole: everywhere people are questioning why things are the way they are, and whether a different world is possible; everywhere people are talking about ‘revolution’ but have no real understanding of what revolution means, no scientific approach to analyzing and dealing with what they are up against and what needs to be done; everywhere people are rising up in rebellion but are hemmed in, let down and left to the mercy of murderous oppressors, or misled onto paths which only reinforce, often with barbaric brutality, the enslaving chains of tradition; everywhere people need a way out of their desperate conditions, but do not see the source of their suffering and the path forward out of the darkness.”
